Say goodnight to your beauty sleep, because it's not coming back any time soon. That's OK though, you're handsome enough to get you by for the next couple of years of no sleep

It'll be a few years before you can parade your kid around on Halloween only to loot their candy later, for now, this will keep your sweet tooth smiling

Who has time to cook? Certainly not you. Ever. Get used to it

Think you'll have even a nano-second to run to the bathroom and wash your hands after changing a diaper? Not going to happen. Make it quicker with hand sanitizer

"Does it smell like something exploded in here?" Yes it does. Your baby's bum

Changing a diaper can be like investigating a crime scene. Try your best to get in and out unscathed

Leave your baby's bottom slicker and cleaner than an ice rink in December

The more help you can enlist when changing diapers, the better. This little army of clothespins will be the closest thing to a best friend you'll see for quite some time

Nothing better than helping your baby burp up those little air bubbles and get your daily squats in...because your gym time is going to be on hiatus for the foreseeable future

"Why does this stroller sound like a haunted house?" Nobody wants to hear the eek and creek of stroller wheels. This oil will make it sound a lot less scary, when you need it

The last thing you need on your daily stroll is a flat tire - because there are no breakdown lanes for strollers. Make a quick fix and patch and get back to rolling your baby around like they're royalty

Welcome to the life of not leaving your house for several weeks at a time. May as well make the most of it and keep those hairy little toes of yours warm

Let's be honest, you will need this...

You can barely handle one baby, you think you're ready for two?

Imagine that everything that bothered you caused you to scream as loud as humanly possible for an indeterminate amount of time. That's your baby. You're going to need lots of ibuprofen

Somehow your baby will find a way to get a paper cut, and they're not even doing your paperwork (yet). For all the little nicks and scrapes, these are a lifesaver

The only peace and quiet you're going to get is either by moving into a cave in the Himalayas, or wearing these on a regular basis, the choice is your. You should note the weather in the Himalayas isn't great

Your new little buddy wants something to calm down. You can't share your whiskey. What do you do? Pacifier to the rescue!

Shake-a Shake-a Shake-a. Repeat process. For hours

Instill the wonderful sense of humor you'll need to have to raise a child with a t-shirt that let's the world know "Comedian in Training."

You're going to be reading a lot, and not a single piece of reading material has a centerfold. Get used to it!

Wait until you see the extinction level event mess your little one can make during meal time. These disposable plates will make it a little more bearable

Imagine how hard it is to eat that fast food at 2am after a few hundred beers. That's how your poor baby feels every meal. The bib will help
